

THE PARTNER FOR YOUR LABORATORY FULL-SERVICE LABORATORY SUPPLIES

Theodor Geyer

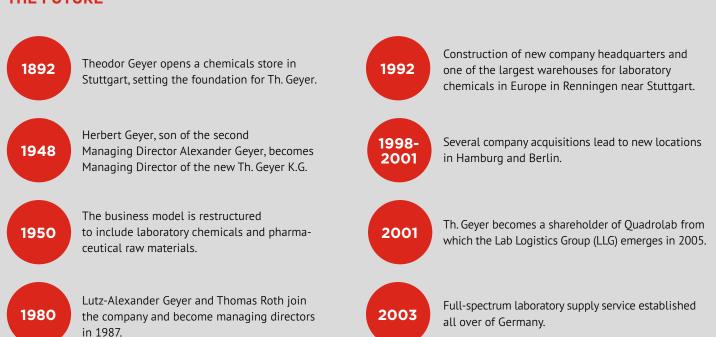

FOCUS ON THE PERSONAL TOUCH YOUR LABORATORY SUPPLIER SINCE 1892

Throughout history, science and research have had a decisive impact on the sustained development of the world. The 19th century produced pioneering discoveries which promoted the start of the chemical industry. The tradesman Theodor Geyer regarded this burgeoning economy as the ideal place to start his chemical trading company. In 1892, he entered a chemicals store in Stuttgart in the commercial register.

He thus laid the foundations for the family-owned company, Th. Geyer, which celebrated its 125th anniversary in 2017. The former Swabian chemicals store has grown over four generations to become an international trading company for full-service laboratory supplies.

Th. Geyer constantly strives to support people working in science and research with the right solutions to supply their ideas. We consider ourselves partners to our laboratory customers and ensure that all the people working there can concentrate on their important work.

MILESTONES ON THE WAY TO THE FUTURE

Many companies, universities, hospitals and both private and public research and development institutes have relied on us for many years. They appreciate our experience, competence and customer proximity through personal contacts for supplies of consumables, instruments, chemicals and Life Science products to the complete equipping of a laboratory.

This is because we focus on the personal touch in our committed business relations. It is also the reason why Th. Geyer has enjoyed constant growth since 1892, keeping pace with customers and their needs. Try out our competences for yourself and join us on a journey to the future.

Lutz-Alexander Geyer Managing Partner

FULL SERVICE FOR YOUR LAB

RELIABLE DELIVERIES AND SERVICES

Perfect full-service laboratory supplies

As a family-owned company we are manufacturer-independent advisers and suppliers. We provide you with access to over 200 top brands, so you benefit in every way: you obtain everything you need for your laboratory from a single source – safely and reliably. This simplifies your processes and reduces your costs.

Reliable contacts

We place great importance on customer proximity and personal consulting. You receive support at Th. Geyer from our regionally assigned experts in field sales and our back office. If you are a major customer, our key account managers are on standby with comprehensive services to deal with your individual requirements and needs at all times.

Full ordering service

You can send us your orders through the channel that suits you best: either personally with your contact partner, or by phone, fax or email, or at your convenience in the web shop. Delivery and invoicing can be done on a cost centre-related basis.

Electronic catalogues

We provide direct access to your catalogue or ERP system through Open Catalog Interface (OCI) or other customer interfaces so that you can access the Th. Geyer product portfolio and services. Our IT experts are always at hand to provide you with support.

Customised services

Benefit from customised supply chain solutions, e-procurement tools and optimised logistics. Global sourcing, batch reservations or forward and call orders offer you maximum flexibility and safety for your procurement.

Certified quality

Of course, our quality management system is certified in accordance with ISO 9001:2015. All processes at Th. Geyer are organised to supply our customers everything they need – safely, reliably and with short delivery times. Many products are in stock at our logistics centres. We will gladly procure products which are difficult to source simply because your satisfaction is our prime motivation – together with quality.

FULL SERVICE FOR YOUR LABORATORY

Your laboratory requirements are diverse and complex. When you have Th. Geyer as your supplier, you have access to a portfolio comprising over 1.5 million products. That leaves nothing to be desired. Whether you are looking for individual products or you want to fully equip your laboratory, we have the right supplies for your idea in all sectors.

CONSUMABLES AND EQUIPMENT

If you require general laboratory supplies, analytical measurement and testing, chromatography or liquid handling, to name but a few sectors: you demand top quality and reliability when it comes to laboratory equipment.

The Th. Geyer portfolio contains only manufacturers and brands which meet these criteria. Of course, this also applies to the right high-quality consumables ranging from adapters to wipes.

CHEMICALS

From A for acetone to Z for zinc sulphate. Th. Geyer supplies your laboratory with chemicals and reagents, customised solutions, indicator solutions, biological buffers, dehydrated culture media, supplements and media components.

Since 1992, we have operated one of the largest warehouses for laboratory chemicals in Europe in Renningen near Stuttgart. In 2016, we significantly increased its capacity and created space for a total of 11,000 products which we ship directly from stock.

LIFE SCIENCE

Competent consulting and special commitment to your individual requirements in the Life Science sector – this is what we stand for at Th. Geyer with a specially trained team of biologists and biochemists in field sales and product management.

Through our collaboration with many well-known manufacturers in the sectors of cell biology, genomics, proteomics, microbiology, microscopy/histology, Life Science laboratory supplies and biochemicals, you benefit from an extensive selection of products and brands at attractive prices.

LABORATORY EQUIPMENT

Th. Geyer caters to a perfect laboratory environment by providing tailor-made planning and optimised equipment. If you need a laboratory stool or a safety storage cabinet, we have the right solution as well as the right equipment for extensions or updates to your laboratory or for completely new laboratories.

Our experts assist you to obtain everything from a single source: consulting, planning, delivery, installation, start-up and service. Among other things, we are a Köttermann partner and offer you everything from the EXPLORIS® Systemlabor range.

At the end of this brochure, there is a tear-out leaflet containing an extract from our manufacturer list comprising over 200 manufacturers and brands. Please go online to find the latest version of our current product catalogue by scanning the QR code.

TWO TOP BRANDS

ALWAYS AN ATTRACTIVE OPTION

In your daily work, you need reliable laboratory consumables and equipment so that you can concentrate on what is most important. With LABSOLUTE® products, you're on the safe side in every field.

- All LABSOLUTE® products are manufactured under stringent conditions and are subjected to regular quality controls.
- Top quality at attractive prices this is one thing you can always depend upon with LABSOLUTE®.
- Our portfolio, which we are continuously expanding, offers you a wide selection of all general or special laboratory consumables.

CHEMSOLUTE® offers you a wide range of first-class products, providing the perfect solution for your laboratory: Chemicals, reagents, solutions and biological buffers. But one thing is certain with all CHEMSOLUTE® products:

- they are suitable for laboratory use; a wide range meets the requirements according to PH, Eur., ACS or ISO standards.
- Supplied with detailed specifications.
- Maximum reliability in terms of labelling, packaging and transport.

10 The partner for your laboratory

Th. Geyer – Supplying your ideas

OPEN FOR YOU 24 HOURS A DAY

THE TH. GEYER WEB SHOP IN 11 LANGUAGES

As a registered customer, you can use the web shop to access the latest version of the entire portfolio containing the products of all brands, and of course including LABSOLUTE® and CHEMSOLUTE® – easily and conveniently thanks to the following functions:

TARGETED SEARCH

- Simple and expanded search options by keyword, product or CAS number
- Filters for targeted selection by manufacturer, catalogue groups or package sizes

EASY ORDERING PROCESS

• Guides the user conveniently and quickly through the product and price information to ordering

SUPPORT AND SERVICE

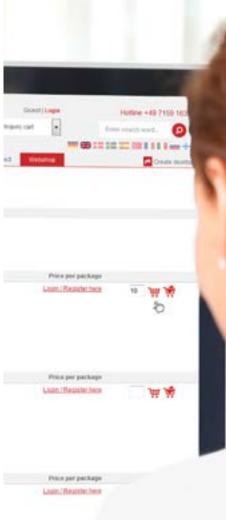

- Ability to connect the online shop to your internal enterprise resource system via OCI
- Support from our in-house IT department
- Own customer mailbox with user tips and exclusive offers

Use these and other useful web shop options at **www.thgeyer.com**

You can also subscribe to our **e-newsletter** there. It provides you with useful information on new products, attractive special offers and invitations to trade fairs and customer events.

At **www.labsolute-chemsolute.com** you will find all the information on products from the LABSOLUTE® and CHEMSOLUTE® brands on a separate website.

PRINT AND ONLINE

THE PERFECT COMBINATION

With our special online offers, you are always bang up to date with the entire portfolio, new products and the latest prices. In everyday laboratory practice, it is often helpful to page through a printed copy. Our catalogues and brochures provide you with a rapid overview of individual product groups or application-specific product ranges.

Here we would like to mention our "Consumables, Equipment and Chemicals" general catalogue as an example. This catalogue has over 1,500 pages and was produced in collaboration with the Lab Logistics Group (LLG) of which we are the major shareholder. The LLG is a global purchasing cooperative and ensures attractive conditions and expands our logistics resources. As a Th. Geyer customer, you definitely benefit from this.

For special requirements, we offer our brochure "CHEMSOLUTE® Microbiology – Dehydrated Culture Media & Supplements". The flyer "CHEMSOLUTE® Green Solvents – For Sustainable Chemistry" describes how we support the "Green Chemistry" concept.

Our special offer brochures LABORTOPS and LIFE SCIENCE SPECIAL appear four times a year and contain news and proven products at special attractive prices.

All the catalogues and brochures relevant to you can be obtained by post or personally on request.

Of course, all publications are also available to download at **www.thgeyer.com**. Print and online media are therefore perfectly combined to keep you up to date about the right products for your laboratory supplies.

12 The partner for your laboratory

Th. Geyer – Supplying your ideas

BE OUR GUEST AT TRADE FAIRS

EXHIBITORS AND ORGANISERS

Personal dialogue with our customers and prospective customers is not empty advertising hype for Th. Geyer. We attend the major trade fairs in Germany as well as Arablab in Dubai and the EuroLab fair in Poland.

As a Th. Geyer customer, you receive free day tickets on request to trade fairs such as Analytica or Achema.

In addition, we invite you as our guest to our in-house laboratory trade exhibitions. At **LAB**SOLUTIONS you meet experts from all laboratory sectors. These Th. Geyer fairs take place up to twice a year in different regions of Germany.

Short distances create more time for technical discussions with well-known exhibitors about new products and advanced developments. Interesting lectures with a high practical relevance give your visit that added extra. This exhibition format shows how we strive for greater customer proximity and service orientation in "Supplying your ideas".

ALWAYS NEAR YOU

YOUR DIRECT LINE TO US

Experienced and qualified staff in field sales and our back office personally look after solutions for supplying your ideas.

BERLIN

Since 2001, our presence in the federal capital and metropolis of Berlin offers a high level of consulting competence and services for numerous customers.

HAMBURG

Since 1999 customers in the north benefit from the wealth of experience of the team at this traditional location. Our clients include several well-known hospitals.

HÖXTER

This is not only the headquarters of Th. Geyer Ingredients, Th. Geyer's second major division, but also the modern logistics centre for laboratory consumables and equipment.

LOHMAR

The metropolitan region in the west is densely populated and is where numerous customers have their head offices. They are competently serviced by our motivated team at our branch in Lohmar.

RENNINGEN

The head offices of Th. Geyer in the midst of the Stuttgart economic region form the seat of our executive management, central administration and the enormous logistics centre for laboratory chemicals (5,500 m²).

SCANDINAVIA

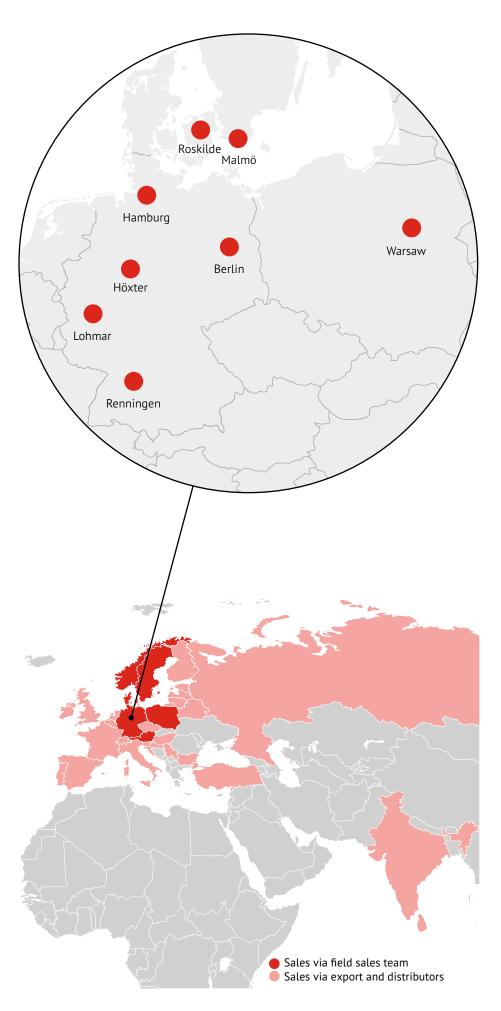

Th. Geyer is present in Denmark and Sweden with separate companies which service customers in the Scandinavian region with motivation and competence.

POLAND

Our customers in Poland are serviced by experienced experts at Th. Geyer Polska Sp. z o.o. which was founded in Warsaw in 2018.

OTHER COUNTRIES

Our customers in countries without subsidiaries are supported by our Export team of experts in Renningen or by distributors with country-specific expertise.
